chronic Ulcers

Eating Sores

An old sore or ulcer is not only a source of great bodily discomfort and pain, but the constant care, worry and anxiety over one of these malignant festering places produces an unhealthy state of the nervous system and the patient becomes morbidly sensitive, miserable and gloomy. No one could be otherwise when haunted by the presence of an inflamed, angry-looking sore, with a continual discharge, carrying with it the life fluids, thus robbing the body of strength and virility. An eating, lingering ulcer naturally fills the sufferer with fear while noting the daily growth of the sore, from which there is a slow but perpetual discharge of yellow or greenish watery matter, and feeling the dull, throbbing or sharp shooting pains as the poison penetrates the tender tissues and reaches the bone.

The same germ-producing, cancer-tinted blood is back of every sore or ulcer, large or small, that does not promptly and permanently heal; the little blister upon the lip, tongue, the warty growth and other parts of the body, and the almost imperceptible tumor or lump upon the breast, as often result in Cancer as the deeper and more frightful-looking ulcers. They feed upon the same morbid and destructive materials that are generated within the blood, and inflammation and destruction of tissue will continue just so long as this impure matter is carried through the circulation and around the edges, and a permanent drain upon the system.

About a year ago I wrote the Medical Director of the U. S. Cavalry, asking him whether or not your S. S. would cure Cancer, as my wife had one on her breast, which three or four of the best physicians had cut out and removed by a plaster. Upon receipt of your letter, I thought it would be well to let you know what was said. I did not tell you until now because I wanted to know if the cancer would be removed by a simple operation, or a return of a return and I waited in order to let others know what a wonderful medicine your S. S. is. My wife had a sore on her breast which was removed after she had taken 13 or 14. I find as though your S. S. could not be hardly recommended.

washes, salves, nor anything else applied directly to the sore, neither does the use of the knife or flesh destroying plaster cure, for local causes have nothing to do with these germ-breeding plague spots. You might cut out every particle of the diseased flesh and sear the bone, but another sore would come. The germs or poison in the blood must be destroyed, the stream of sluggish, polluted blood purified and made strong before the healing process begins and the sore or ulcer can get well. S. S. is the only remedy known that can and does accomplish this. It cleanses and purifies the circulation, and when new, rich blood is carried through the little veins and arteries to the sore, the cure is soon effected. S. S. not only expels all impurities, but works a complete and radical change in the entire system by stimulating inactive organs, toning up the nerves, increasing the appetite, and aiding the digestion and assimilation of food, thus building up the weak and wasted constitution. S. S. is strictly and entirely a vegetable medicine, and no bad effects follow its use, and for this reason it is better than Mercury and its salts, which not only ruin the stomach, but often produce most stubborn and offensive sores themselves.

Prompt treatment should be given a sore or ulcer, no matter how small it may be, whether external or internal, for what you think a simple sore, may, in reality, be an undeviated Cancer. Our physicians will gladly advise all who need their services, and those who write us will receive valuable suggestions regarding the treatment of their case free of charge.
